

SecureWi-Fi

Our SecureWi-Fi + Your Business = Endless Possibilities

Technology has changed the way everyone does business. Organizations of all types and across all industries are facing increased pressure from customers, vendors, and even employees to offer secure and fast wireless access. Wi-Fi is a necessity that has become all about convenience, security, and performance. T. Daniels Consulting doesn't just offer Wi-Fi connectivity, we offer enterprise-grade security along with optimized performance and speed resulting in increased productivity for your business. When you deploy a T. Daniels Consulting access point that has Wi-Fi enabled with **SecureWi-Fi**, you unlock the full potential of your Wi-Fi access points with powerful Wireless Intrusion Prevention System (WIPS), real-time, business-driven analytics, and valuable engagement and marketing tools.

Verified Comprehensive Security

T. Daniels Consulting's **SecureWi-Fi** automatically protects your business from the six known Wi-Fi threat categories. Our patented Wireless Intrusion Prevention System (WIPS) defends your airspace from unauthorized access points and users, unapproved devices, and more – and with close to zero false positive.

Guest Wi-Fi & Marketing ROI

T. Daniels Consulting provides a complete guest **SecureWi-Fi** solution with not only secure Wi-Fi access, but a unique way to onboard guest users of your Wi-Fi – including integration with social networks, and built-in templates to create beautiful splash pages without any design or web development skills. With **SecureWi-Fi's** business-driven analytics, your organization can gain insights on user presence and behavior to help the marketing department make smart decisions about storefront displays, campaigns, and guest engagement.

Cloud Management That Scales

The T. Daniels Consulting **SecureWi-Fi** solution can take your business from one to an unlimited number of access points across multiple locations, with no controller infrastructure. Template-based management and reporting is a breeze with a hierarchical-based structure enabling many ways of grouping, including location, building, floor, and customer.

Intelligent Network Visibility and Troubleshooting

SecureWi-Fi confidently provide answers to the most challenging Wi-Fi network questions, bringing the most complete set of Wi-Fi visibility, troubleshooting, and network health features ever introduced to the market. Pinpointing meaningful network problems and application issues by seeing when an anomaly occurs above baseline thresholds and remote troubleshooting

You Need a Trusted Wireless Environment

SecureWi-Fi is a framework for building a complete Wi-Fi network that is fast, easy to manage, and most importantly, secure. T. Daniels Consulting is dedicated to providing you with the technology and solutions that you can use to build a Trusted Wireless Environment – delivering on each of the three core pillars:

- 1 MARKET-LEADING PERFORMANCE**
 You should never be forced to compromise security to achieve adequate performance to support your environment with the speed, connections and device density that it needs.
- 2 SCALABLE MANAGEMENT**
 With easy set-up and management, you should be able control your entire wireless network, big or small, from a single interface.
- 3 VERIFIED COMPREHENSIVE SECURITY**
 You need proof that your security solution defends your business against Wi-Fi attacks and can deliver on the following benefits:
 - Provide automatic protection from the six known Wi-Fi threat categories
 - Allow legitimate external access points to operate in the same airspace
 - Restrict users from connecting to unsanctioned Wi-Fi access points

T. Daniels Consulting’s SecureWi-Fi Outperforms Competition

T. Daniels Consulting’s SecureWi-Fi solution provides the strongest protection from all six known Wi-Fi threat categories using patented WIPS technology and is the ONLY vendor to:

- Support automatic detection and prevention of rogue access points and rogue clients
- Automatically detect and prevent endpoints from communications over ad-hoc Wi-Fi connection
- Automatically prevent connections to “evil twin” access points and dangerous connections to misconfigured access points such as private SSIDs without encryption

Test	T. Daniels Consulting Secure Wi-Fi		Aruba IAP335		Cisco Meraki MR53		Ruckus R710	
	Detect	Prevent	Detect	Prevent	Detect	Prevent	Detect	Prevent
Rogue AP	P	P	F	N/A	F	MP	F	N/A
Rogue Client	P	P	F	N/A	F	MP	N/A	MP
Neighbor AP	P	P	P	P	F	N/A	F	N/A
Ad-Hoc Network	P	P	F	N/A	F	N/A	P	N/A
“Evil Twin” AP	P	P	P	F	P	MP	P	F
Misconfigured AP	P	P	P	N/A	N/A	N/A	N/A	N/A
Concurrent Threats	P	P	F	F	F	F	F	F

Features You Need, Nothing You Don't

T. Daniels Consulting's **SecureWi-Fi** packages enable you to quickly and easily find the right set of features your business needs today...and tomorrow.

T. Daniels Consulting's Wi-Fi Solutions	TotalWi-Fi	SecureWi-Fi	BasicWi-Fi
Management Platform	Cloud	Cloud	Appliance
Scalability Number of managed access points.	Unlimited	Unlimited	Limited
Configuration and Management SSID configuration with VLAN support, band steering, smart steering, fast roaming, user bandwidth control, Wi-Fi traffic dashboard.	✓	✓	
Additional Wi-Fi Cloud-Based Management Radio Resource Management, Hotspot 2.0, enhanced client roaming, nested folders for configuration before deployment, integration with 3rd party WLAN controllers.	✓	✓	
Intelligent Network Visibility and Troubleshooting Pinpoint meaningful network problems and application issues by seeing when an anomaly occurs above baseline thresholds and remotely troubleshoot.	✓	✓	
Verified Comprehensive Security A patented WIPS technology defends your business from the six known Wi-Fi threat categories, enabling a Trusted Wireless Environment.	✓	✓	
Guest Engagement Tools Splash pages, social media integrations, surveys, coupons, videos, and so much more.	✓		
Location-Based Analytics Leverage metrics like footfall, dwell time, and conversion to drive business decisions and create customizable reports	✓		

Network Security

In addition to delivering enterprise-grade security, our platform is designed from the ground up to focus on ease of deployment, use, and ongoing management, making T. Daniels Consulting the ideal solution for SMB, midsize, and distributed enterprise organizations.

SecureWi-Fi

T. Daniels Consulting's **SecureWi-Fi** solution, a true game-changer in today's market, is engineered to provide a safe, protected airspace for Wi-Fi environments, while eliminating administrative headaches and greatly reducing costs.

Multi-Factor Authentication

T. Daniels Consulting **SecureFactor** is the right solution to close the password-driven security gap that leaves companies vulnerable to a breach. It provides multi-factor authentication on an easy-to-use Cloud platform.
